BULLETIN OF THE KOREAN MATHEMATICAL SOCIETY
大韓數學會報

Since its inception in 1964, this journal endeavors to publish significant research developments of broad interests in pure and applied mathematics. One volume is published each year, and each volume consists of six issues (January, March, May, July, September, November).

Editorial Policy

To be published in the *Bulletin*, a paper must be correct, new, nontrivial, and significant.

Submission of Manuscripts

See **Information for Authors** at the end of this issue.

Copyright

A Copyright Transfer Agreement is required before the publication of a paper in this journal. The submission of a paper implies the author's assurance that it has not been copyrighted, published, nor submitted for publication elsewhere.

Subscriptions

The subscription price is US\$80 per year to individuals and US\$140 per year to institutions. Members of the KMS receive exclusive discount on annual subscriptions to KMS journals. Correspondences regarding subscriptions, membership, and notices of change of address should be sent to:

The Korean Mathematical Society, The Korea Science and Technology Center 202,
22, 7Gil, Teheran-ro, Gangnam-gu, Seoul 135-703, Korea
E-mail: kms@kms.or.kr

Reciprocal Membership Agreements

The KMS has reciprocal membership agreements with the American Mathematical Society, the Indian Mathematical Society, the Mathematical Society of Japan, the Royal Spanish Mathematical Society and Société Mathématique France. Any member of these societies may join the KMS at half of the current rate.

Publications of the Society

The KMS publishes three research periodicals, the Journal, the Bulletin, and the Communications. The Journal and Bulletin are published bimonthly and the Communications is published quarterly.

Indexing and Abstracting Services

Articles published in this journal are indexed or abstracted in ISI Alerting Services®, Mathematical Reviews, Science Citation Index-Expanded® and Zentralblatt für Mathematik.

Published by the Korean Mathematical Society

Printed in Korea, January 2014

This journal was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government.

Continued from back cover

Metric theorem and Hausdorff dimension on recurrence rate of Laurent series	
Xue-hai Hu, Bing Li, and Jian Xu	157
On Gorenstein cotorsion dimension over GF-closed rings	
Zenghui Gao	173
On solvability of the dissipative Kirchhoff equation with nonlinear boundary damping	
Zai-yun Zhang and Jian-hua Huang	189
Identities with additive mappings in semiprime rings	
Ajda Fošner and Nadeem ur Rehman	207
Gradient Ricci solitons with semi-symmetry	
Jong Taek Cho and Jiyeon Park	213
A note on exponential almost sure stability of stochastic differential equation	
Xuerong Mao, Qingshuo Song, and Dichuan Yang	221
Hybrid d -ary trees and their generalization	
Seoungji Hong and Seungkyung Park	229
The hyponormal Toeplitz operators on the vector valued Bergman space	
Yufeng Lu, Puyu Cui, and Yanyue Shi	237
Modules whose classical prime submodules are intersections of maximal submodules	
Marzieh Arabi-Kakavand and Mahmood Behboodi	253
An upstream pseudostress-velocity mixed formulation for the Oseen equations	
Eun-Jae Park and Boyoon Seo	267
On nonsmooth optimality theorems for robust optimization problems	
Gue Myung Lee and Phạm Tiến Sơn	287

CONTENTS

A Lyapunov characterization of asymptotic controllability for nonlinear switched systems Yanling Wang and Ailing Qi	1
Perturbation results for hyperbolic evolution systems in Hilbert spaces Yong Han Kang and Jin-Mun Jeong	13
On some solutions of a functional equation related to the partial sums of the Riemann zeta function Juan Matías Sepulcre Martínez	29
Existence of solutions for nonlinear evolution equations with infinite delay Qixiang Dong and Gang Li	43
Extinction and non-extinction of solutions to a fast diffusive p -Laplace equation with a nonlocal source Yuzhu Han, Wenjie Gao, and Haixia Li	55
Shadowing, expansiveness and stability of divergence-free vector fields Célia Ferreira	67
Stability of zeros of power series equations Zhihua Wang, Xiuming Dong, Themistocles M. Rassias, and Soon-Mo Jung	77
Finite logarithmic order solutions of linear q -difference equations Zhi-Tao Wen	83
Multiple solutions for a p -Laplacian system with nonlinear boundary conditions Jun Zhou and Chan-Gyun Kim	99
On the second approximate Matsumoto metric Akbar Tayebi, Tayebah Tabatabaeifar, and Esmail Peyghan	115
Origin-symmetric convex bodies with minimal Mahler volume in \mathbb{R}^2 Youjiang Lin and Gangsong Leng	129
Error estimates of RT1 mixed methods for distributed optimal control problems Tianliang Hou	139
